

# Sliquid Naturals SILK

Sliquid Naturals Silk is a water based intimate lubricant blended with cream emollients and silicone to create a unique hybrid lubricant. The lotion-like formulation starts with our ever popular Naturals H2O, and is blended with 9% silicone and creamy emollient esters resulting in a luxurious creamy glide. Naturals Silk has the easy-to-clean-up characteristics of a water based lubricant with the added longevity of a silicone lubricant. The cream emollients help to create a soft, padded texture that naturally moisturizes your most delicate skin. Naturals Silk is always glycerin and paraben free, and is perfect for couples or for solo use.

*Created by sensitive women,  
For sensible women.*

- ~ UNIQUELY BLENDED TO ENHANCE YOUR BODY'S OWN NATURAL MOISTURE

*Love Your Body!*

Made Proudly in the USA

**PURIFIED WATER** - Nature's purest ingredient, purified H2O makes up 82% of this glide.

**PLANT CELLULOSE** - Derived from cotton, our plant cellulose serves as a natural, vegan friendly & gluten free thickening agent that gives Sliquid it's glide.

**ISOPROPYL PALMITATE** - A gentle moisturizer, containing Vitamin A and antioxidants.

**POLYSORBATE 20 & EMOLLIENT ESTER** - Polysorbate 20 is a surfactant made from Lauric Acid (Olive Oil source) that, along with Emollient Ester helps prevent the separation of water and cellulose from the silicone.

**DIMETHICONE** - A pharmaceutical grade silicone.

**POTASSIUM SORBATE** - Known as "the wine stabilizer" potassium sorbate is a body safe, non-toxic, non-irritating preservative used to extend shelf life and prevent contamination.

**CITRIC ACID** - A natural anti-fungal, citric acid works together with Potassium Sorbate to act as a pH buffer, ensure product purity and extend shelf life.

**Important:** Do not use if safety seal is broken/missing. Should any irritation occur, discontinue use at once. Keep out of children's reach.
