

Sliquid Naturals Spark

.....

Ignite your passion once again with Sliquid Naturals Spark, our stimulating silicone personal lubricant that is both long-lasting and 100% water-proof. Formulated from a concentrated blend of pharmaceutical-grade silicones, then infused with just the right amount of invigorating food-grade menthol, Spark will last for hours while offering a tantalizing experience of both cooling and warming sensations. With Sliquid Naturals Spark, a few drops go a long way and its is easy to clean up with simple soap and water (except from some cloth materials). Sliquid Naturals Spark is ideal for anyone searching for an intimate lubricant that provides maximum stimulation to enhance pleasure.

.....

Love Your Body!

DIMETHICONE - The most commonly used silicone in the cosmetic industry, dimethicone is found everywhere from makeup to hair conditioner, and is used for it's skin conditioning properties.

DIMETHICONOL - Another slick silicone based polymer which has anti-foaming and ideal skin moisturizing and conditioning properties.

CYCLOPENTASILOXANE - This one is the silicone that keeps everyone coming back for more. It is the most expensive, and the most luxurious, and is the silicone compound that makes silicone lubricants ultra slick.

FOOD GRADE MENTHOL - Menthol is the active ingredient in Naturals Spark. Menthol has a minty scent, and feels cool to the touch. It begins to warm rapidly with friction, providing an intense stimulating sensation.

Important: Do not use if safety seal is broken/missing. Should any irritation occur, discontinue use at once. Keep out of children's reach.

Made Proudly in the USA
